

Independent grant support to accelerate the adoption of evidence-based innovations

We are delighted to announce the launch of Pfizer's Independent Grants for Learning & Change (IGLC) programme for endocrinology

What does the IGLC programme cover?

Pfizer's IGLC programme aims to provide grants for projects which seek to improve patient outcomes through the delivery of measurable, educational programmes and / or quality improvement initiatives.

A total of \$300,000 is available for this programme and individual projects requesting up to a maximum of \$150,000 will be considered that address gaps in:

- Healthcare provider or patient / carer knowledge and education
- Healthcare provider competence or performance
- Organisation and management of healthcare systems

In 2017, our intention is to support projects that focus on **the importance of the identification and management of adult growth hormone deficiency.**

Please note that this programme is not intended for the funding of *clinical* research, however applications for research into health services are welcome.

Who can apply for an IGLC grant?

This programme is open to healthcare providers, quality improvement experts and stakeholders involved in the multidisciplinary care of patients within the field of endocrine in Europe, Australia and New Zealand.

Applications and key dates

Applications are open from **22nd February 2017**, and the process is comprised of two stages. To be considered, you will first be required to submit a letter-of-intent, after which, you may be invited to submit a full proposal.

Additional information

- To learn more about the application process, or to apply, please refer to the request-for-proposals (RFP) document at: http://www.pfizer.com/responsibility/grants_contributions/request_proposals

Please refer to the RFP, 'IGLC Endocrine Europe, Australia, New Zealand'
