

14 September 2015

Congratulations to ESA new life members

Professor Iain Clarke

Professor Jeffrey Zajac

Congratulations to ESA 2015 award winners

Servier Award – Christian Girgis
ESA Mid-Career Award – Lisa Moran
ESA Senior Plenary Award – Evan Simpson
Novartis Award – Dilys Leung
Bryan Hudson Clinical Endocrinology Award – Ada Cheung
ESA/IPSEN International Travel Grant – Sally Abell, Sybil McAuley, Jaesung Choi, Keely McNamara
AWE Award – Amanda Rickard, Ying Wan

IMPORTANT DEADLINES:

ESA Postdoctoral Award	30 October 2015
ESA Research Higher Degree	30 October 2015
ESA Ken Wynne Memorial Postdoctoral Scholarship	16 November 2015

Apply for ESA awards: <http://www.endocrinesociety.org.au/awards-and-grants.asp>

Opportunities for clinicians working in the health sector - ESA is encouraging relevant members to apply however members will need to partner in funding with their employing organisations. [**Download further information**](#)

Deadline: 18 September 2015

[**Wesfarmers Chair in Endocrinology & Diabetes**](#)

The newly established Wesfarmers Centre for Translational Research focuses primarily on metabolic and vascular diseases and investigator driven clinical trials. As Co-Director of the Centre the appointee will have the opportunity to play a lead role in creating a world-class team of high quality translational researchers and generate the critical mass required to perform cutting-edge research that will deliver important clinical outcomes.

New ESA initiative! “Find a researcher”

ESA Council would like to provide a facility for members to explore research interests represented within the Society, identify researchers who are willing to review manuscripts or grants, and those willing to receive invitations to speak at local or national meetings. The primary aim is to encourage research interactions and collaborations, the secondary aims are to raise the profile of emerging and early career researchers and establish the Society’s membership as a valuable national resource for peer review activities related to research.

Council encourages ESA members to “opt in” by providing details of their qualifications, training, current position, research interests and “top 5” recent publications to a member-access database. The database will provide a means for researchers to identify potential collaborators, and promote interactions between clinical and laboratory-based researchers within the Society. These data will be accessible only to other members of ESA.

If you would like to be listed in ‘Find a Researcher’ Log in at the ESA homepage: <http://www.endocrinesociety.org.au/>
Go to resources.

Find an Endocrinologist

The Endocrine Society of Australia receives regular enquiries to recommend an endocrinologist with particular interests or expertise. Endocrinology is a broad field, which includes some very common conditions, but also some very rare ones. As a result, people who have rare conditions may benefit from seeing a specialist with additional experience or expertise. The Society comprises clinical endocrinologists and also scientists, who research endocrine disorders but do not see patients. Clinical members of the Society have been invited to submit their contact details and self-nominated areas of interest. Please note that the Endocrine Society of Australia is providing this as a community service to help patients find a suitable endocrinologist (considering both geographical issues and area of interest). The Society is not endorsing or recommending any of the listed clinicians or their degree of expertise.

The general public will be able to search for an Endocrinologist in this section: <http://www.endocrinesociety.org.au/search-for-an-endocrinologist.asp>

If you would like to be listed in ‘Find an Endocrinologist’ Log in at the ESA homepage: <http://www.endocrinesociety.org.au/>

PATIENT RESOURCES IN ENDOCRINOLOGY- a partnership between ESA and the US Endocrine Society

<http://www.endocrinesociety.org.au/patient-resources/index.asp>

The Endocrine Society of Australia have established an international collaboration with the US Endocrine Society to adapt patient information to the Australian setting and make them readily available.

These resources are rigorously developed, evidence based and aimed to support patients to understand their endocrine condition with the support of their doctor.

Click for resources

These are available in both English and Chinese.

*This information is designed to be informative and educational. It is not intended to provide specific medical advice or replace advice from your doctor.

*Please note that only the information on the Australian link below is adapted to national settings including medications and tests. Other resources on the US website may be helpful but may not be consistent with Australian practice.

PRE-NOTICE OF POSSIBLE RESEARCH OPPORTUNITY

A Possible Research Opportunity May Arise For Endocrine Or Neurology Trainee

A 1 yr project is currently being considered for a suitable trainee interested in, or already training in, *either* endocrinology or neurology, in the first instance; a possible extension for second year may arise.

The primary goal of the position would be research directed to ascertain the possible links between metabolic and neurological disease and to study novel treatments based on that link. The second goal of the position is to ultimately encourage development of clinicians with expertise that spans both disciplines and in particular interested in researching and ultimately practicing at the interface between neurology and endocrinology.

Project includes:

1. Writing a review of the literature;
2. Establishing, documenting and running initial case studies in Parkinson's patients, using novel metabolic agents in subjects with Early Parkinson's disease for benefit of neurological disease; as well as investigating possible inflammatory, genetic and metabolic associations with disease.
3. Preparation/commencement of a clinical trial of a metabolic agent in suitable Parkinsonian subjects in randomised fashion

Site: Neurology and Endocrine Departments St Vincent's Hospital and Garvan Institute of Medical Research Neurodegeneration Research Laboratory

Supervision:

Prof. Bruce Brew; Prof LV Campbell
Dr. Bryce Vissel
