Arthritis and Osteoporosis Victoria webinar: Update on Osteoporosis Management – 2014

Title: Update on Osteoporosis Management – 2014

Date and Time: 7-8pm (AEST), Tuesday 12 August 2014

Presenter: Prof Peter Ebeling, Professor of Medicine; Head - Department of Medicine, School of Clinical Sciences at Monash Health; President, Endocrine Society of Australia and Consultant Endocrinologist for Monash Medical Centre.

Audience: Health professionals of various disciplines across the musculoskeletal health and other sectors

Webinar overview: This webinar aims to increase the capacity of participants in the musculoskeletal health workforce to both diagnose and manage osteoporosis. It will focus on the assessment of absolute fracture risk and the evidence-based treatment of post-menopausal women and men with osteoporosis and other aspects of osteoporosis management. The role of adequate calcium and vitamin D, and regular weight-bearing exercise in osteoporosis prevention will also be discussed.

The 8th International Congress of Neuroendocrinology 2014 in collaboration with the 18th Annual Meeting of the Society for Behavioural Neuroendocrinology will be held from Sunday 17 August until Wednesday 20 August 2014, at the [Hilton Sydney](#), Australia.

Website: <http://www.neuroendocrinology2014.org/>

ESA Sponsored Symposium

Robert Baxter, University of Sydney

Chen Chen, University of Queensland

Ken Ho, Princess Alexandra Hospital, Brisbane, Queensland, Australia

Michael Waters, University of Queensland, Australia

The congress aims to deliver the best in Neuroendocrinology in both the basic and clinical areas. The meeting will attract outstanding Neuroendocrinologists from all around the globe.

Plenary Lecturers include:

- **Mitsuhiro Kawata** (Japan)
- **Stafford Lightman** (UK) - (Mortyn Jones Lecture, British Society for Neuroendocrinology)
- **Peg McCarthy** (USA)
- **Gilles Mithieux** (France) - (Jacques Benoit Lecture, Société de Neuroendocrinologie, France)
- **Tony Plant** (USA) - (Geoffery Harris Lecture, International Neuroendocrine Federation)
- **William Rostene** (France)
- **Scott Sternson** (USA)
- **Zuoxin Wang** (USA)

Plus over 60 Symposium Speakers!

Topics include the Neuroendocrinology of Stress, Reproduction, Growth, Lactation, Pregnancy, Metabolic function and various areas of Psychoneuroendocrinology.

Positions Available for Group leaders at MIMR-PHI Institute

MIMR-PHI Institute of Medical Research: In January 2014, the Monash Institute of Medical Research (MIMR) and Prince Henry's Institute of Medical Research (PHIMR) merged to form MIMR-PHI Institute of Medical Research, creating one of the largest medical research Institutes in Australia. The mission of our researchers is to improve global well-being through excellence in medical research and clinical applications.

The positions: MIMR-PHI is seeking to expand its research base through the recruitment of several new group leaders with active research programmes in any of the following themes: cancer, endocrinology, genetics and epigenetics, inflammatory and infectious diseases, fetal and neonatal medicine, women's and children's health, reproductive health or stem cells. Applications are sought from highly motivated individuals at any career stage with outstanding track records of achievement relative to opportunity and with evidence of success in obtaining competitive research funding from national and/or international bodies. We are seeking individuals who will be able to engage in collaborative research projects with researchers at MIMR-PHI and/or with researchers/clinicians based at the Monash Health Translation Precinct. Applicants will be expected to take up their positions in early 2015. Successful applicants will be offered an attractive salary package, including highly competitive laboratory start-up funds, and will have access to all of the infrastructure and facilities available on site, as well as to those based at Monash University. For further information, please refer to the MIMR-PHI website <http://mimr-phi.org/facilities/>

The Monash Health Translation Precinct (MHTP): MIMR-PHI employs over 300 staff and 100 postgraduate students and has an expected annual research budget of over \$48 million. Scientists and clinicians of the new institute are at the forefront of discovery and translational research in the themes listed above. MIMR-PHI is a key partner in the MHTP with Monash University and Monash Health which services over 40% of Melbourne's population and has a combined research budget of \$69 million. As part of a co-operative initiative between all partners, a new \$84 million state-of-the-art Translational Research Facility (TRF) is currently under construction at this site. The TRF, due for completion in 2015, will promote interactions between medical researchers and clinicians: to provide world-leading healthcare; to shape discovery research according to clinical needs; and to translate innovative scientific discoveries into tangible outcomes, including best clinical practice. MHTP researchers and clinicians will be located along thematic lines to encourage inter-departmental and cross-disciplinary research. The TRF building will house a new clinical research floor, a platform technology floor (Medical Genomics, Cell Therapies, Micro-imaging and Biomarkers/Proteomics), as well as multidisciplinary research floors.

Enquiries: Ms Ann Scott

Phone: +61 3 9902 4702

Email: Ann.Scott@mimr-phi.org

Applications:

Interested individuals for the positions above should send the following documents to Ms A. Scott (Ann.Scott@mimr-phi.org):

1) a full C.V.; 2) a 2 page research plan; and 3) 3 names of referees with full contact information. The deadline for applications is 1 September, 2014. The formal process of applicant selection will commence from that date and continue until suitable applicants have been appointed.

Endocrine Advanced Trainee (RCY and core), Darwin, 2015

We are currently recruiting for two positions of endocrinology advanced trainee registrar at Royal Darwin Hospital for 2015. One position is accredited as a required clinical year and the other is accredited as a core year. The positions provide unique training opportunities in Indigenous and remote endocrinology. For further information please contact A/Prof Louise Maple-Brown: via switch on 08 8922 8888 or louise.maple-brown@menzies.edu.au. Applications close **Friday 15 August 2014**.

To apply, please send CV with contacts of two referees and a cover letter outlining your specific interest in training in endocrinology in the NT to RDHMedicine.THS@nt.gov.au and copy to louise.maple-brown@menzies.edu.au.

11TH ASIA PACIFIC CONFERENCE
ON DIABETIC LIMB PROBLEMS
14 – 15 November 2014

Event Name:	11 th Asia Pacific Conference on Diabetic Limb Problems
Dates:	14 – 15 November 2014
Venue:	Monash University – Parkville Campus, VIC, Australia
Website:	www.apcdlp2014.com
Abstract Submission Deadline:	30 August 2014
Earlybird Registration Deadline:	26 September 2014

The conference will bring together leading Diabetes specialists from Australia and the Asia Pacific region. The event is being hosted and supported by Monash University and in particular The Faculty of Pharmacy and Pharmaceutical Sciences. The conference has been endorsed by the Australian Wound Management Association, the Advanced Practising Podiatrists High Risk Foot Group and Diabetes Australia.

The comprehensive program will examine all major aspect of Diabetes and in particular the Diabetic foot. Topics that will be covered by both Australian and invited overseas speakers will include:

- Diabetes a major regional issue
- Vascular interventions in Diabetes
- Infection a growing risk in the Diabetic
- Pain and the Diabetic
- Orthopaedic surgical issue
- Plastic and reconstruction surgery
- Nutrition and Diabetes
- Regional perspectives in the growth of Diabetes
- The major role of podiatry in the prevention and management of the Diabetic foot
- Cutting edge new science in the use of markers for Diabetic wound healing
- New treatments for charcot foot

The Conference will also expose the delegates to two workshops on Diabetic Foot Assessment and new methods of off-loading the Diabetic foot. These will be conducted on both days of the conference to allow as many registrants to attend the workshops. The conference will invite submissions of both oral presentations and posters, with prizes offered for the best oral presentation by a young investigator and the best poster.

The Asia Pacific Association for Diabetic Limb Problems was formed ten years ago by a small group of health professionals in Singapore and regional countries to help educate and understand the disease and how best to treat the consequences of Diabetic limb injury. The Association holds a meeting each year in a different country in the region bringing together health professionals working in the area. The conference will bring together both leading Australians and also leaders from the region including India, Malaysia, Indonesia, Philippines, Taiwan, Sri Lanka, Hong Kong, New Zealand, China and Singapore. The conference is a unique opportunity to bring together regional health professional, with their Australian colleagues and will hopefully provide a vehicle for on-going collaborations.
